

# QUARRTZ

## Service friendly water cooler

OASIS has now created a new version of its QUARRTZ cooler making it even more service friendly than before. The new model improves the access to the **NEW Service Friendly quick connect Hot Tank** and other internal parts. Replacing the hot tank now takes only **4 minutes** compared to 10 minutes for our traditional RR models. A service technician can now work on a cooler without removing the chassis from the cabinet, also avoiding any possible accidental wire disconnection. To service the cooler, **only one screw** needs to be removed.

### Servicing your cooler has never been so easy and cost effective!

- Stainless Steel Sides & Lower Front Panel with ABS injection moulded trim
- Removable reservoir made of HDPE for easy sanitization
- **Service friendly Hot Tank**
- Adjustable cold water temperature
- Water level controlled by dual float system (POU models)
